Public Schools High School Issues

High School Graduation Requirements

Fact Sheet

January 2006

1. What are the current high school graduation requirements?

In order to receive a standard high school diploma, a student must earn a passing score on the reading, writing, and mathematics components of the grade 10 Florida Comprehensive Assessment Test (FCAT) or scores on a standardized test that are concordant with passing scores on the FACT, earn the requisite cumulative grade point average (GPA) in courses required for graduation, and successfully complete academic credits that meet certain curricular requirements. The options for completing the academic credits are:

- the traditional 4-year, 24 credit graduation option
- a 3-year, 18 credit college preparatory program, or
- a 3-year, 18 credit career preparatory program.
- 2. What are the academic credit requirements for each high school graduation option?

The statutory requirements for each option are as follows:

	4-Year High School Graduation Option	3-Year College Preparatory Option	3-Year Career Preparatory Option
Required credits	24	18	18
District authority to require additional credits	Yes	No	No
Required GPA	2.0	3.0	3.0
Minimum grade in each course to receive credit toward graduation	"D"	"B", weighted or unweighted	"C", weighted or unweighted
Credits required in advanced courses like honors, dual enrollment, AP, etc.	0	6	0

	4-Year High School Graduation Option	3-Year College Preparatory Option	3-Year Career Preparatory Option
Math credits	3; 1 must be at Algebra I or higher level, or be a series of courses equivalent to Algebra I	3 at Algebra I or higher level and be from a course list that qualifies for state university admission	3; 1 must be at Algebra I level
English credits	4, with major concentration in literature & composition	4, with major concentration in literature & composition	4, with major concentration in literature & composition
Natural science credits	3; 2 must have laboratory component, but SBE may waive this requirement	3; 2 must have a laboratory component	3; 2 must have a laboratory component
Social Science credits	3; 1 in American history, 1 in world history, ½ in economics, and ½ in American government	3; 1 in American history, 1 in world history, ½ in economics, and ½ in American government	3; 1 in American history, 1 in world history, ½ in economics, and ½ in American government
Foreign language credits	None required; can be pursued as an elective	2 in same foreign language	None required, can be pursued as an elective
Practical Arts/ Career Education/ Performing Fine Arts credits	1	None required; can be pursued as an elective	3 in a single vocational/career education program; 3 in career/technical dual enrollment courses; or 5 credits in vocational/career education courses

			4-Year High School Graduation Option	3-Year College Preparatory Option	3-Year Career Preparatory Option
		Life Management Skills credits	One-half	None required; can be pursued as an elective	None required; can be pursued as an elective
		Physical Education **	1	None required; can be pursued as an elective	None required; can be pursued as an elective
		Electives	8 1/2	3	2 credits unless 5 credits in vocational/career education process
		Anticipated time to completion	4 years	3 years	3 years
		1, 2004, may cont	ing in an accele inue under the p	rated graduation provisions in plac	06 school year. option before July be when the student n s. 1003.429, F.S.
3.	Can a district school board choose to increase graduation requirements?	With regard to the traditional 4-year, 24-credit graduation option pursuant to s. 1003.43, F.S., the district school boards are authorized to establish GPA or academic credit requirements for graduation in excess of the minimum requirements set forth in statute. However, the class-size implementing legislation in s.1003.03, F.S., requires districts to consider adopting policies to allow students to graduate as soon they have passed the FCAT and received the 24 credits required for graduation (See CSR Implementation Statute).			
		With regard to the accelerated 3-year, 18 credit school graduation options pursuant to s. 1003.429, F.S., the district school boards are expressly prohibited from imposing requirements in addition to those set forth in statute.			
4.	How do the credit requirements for each graduation option compare?	Although the 18-credit standard college preparatory and career preparatory options require fewer total credits for completion, these options are actually more academically rigorous than the traditional 24-credit option. For example, the new college preparatory option requires completion of two years in the same foreign language. The traditional 24-credit option does not contain a foreign language requirement, even though almost every university in the country requires it as a condition for admission. The mathematics and science requirements are also less rigorous under the traditional 24-			

		credit option.
		The number of credits within the college preparatory program aligns with the minimum standards for admission to a state university, while the career preparatory requirements are aimed toward entrance into a technical center or community college for career preparation.
5.	Who is eligible to	To be eligible to choose an accelerated graduation option a student
	enroll in an	shall:
	accelerated	Attain an FCAT reading, math, and writing score of 3 or more on
	graduation	 the most recent assessments taken; and Submit a signed parental consent to enroll in the accelerated
	option?	 Submit a signed parental consent to enroll in the accelerated graduation option to the principal and guidance counselor.
6.	Who determines which high school graduation option the student will pursue?	Each year, district school boards must provide students in grades 6-9 and their parents with information concerning each of the three high school graduation options, including curricula and timeframes for completion. It is then the prerogative of the student and parent to determine which option for high school graduation best prepares the student for his or her postsecondary education or career plan. However, school personnel are required to meet with the student and the student's parent to give an explanation of the relative requirements, advantages, and disadvantages of each graduation option.
		Students and parents should make an initial selection during the student's eighth grade year. If the student and parent fail to make a selection by the end of grade 9, then the default selection is for the traditional 4-year graduation option. The deadline is extended to the end of the student's first semester of grade 10 for a student transferring from a private or out-of-state school or who was prevented from choosing a graduation option due to illness during grade 9. If the student selects a 3-year graduation option, he or she may
_	Ave etualente mis-	change to the 4-year graduation option at any time.
7.	Are students who pursue a 3-year high school graduation option eligible to earn a Bright Futures Scholarship?	Yes. The new acceleration options for graduation align with the appropriate course requirements for earning a Florida Bright Futures Scholarship. A student's choice of high school graduation options should not affect the student's ability to earn a Bright Futures Scholarship.
8.	What is the difference between accelerated high school graduation and acceleration mechanisms?	Although the accelerated graduation options provide an additional way for students to shorten the time necessary to complete the requirements of a high school diploma, the options differ from the articulated acceleration mechanisms in s. 1007.27, F.S., in that the accelerated high school graduation options do not necessarily encompass a postsecondary component. Nonetheless, students choosing to pursue an accelerated high school graduation option may simultaneously pursue acceleration mechanisms.

Physical Education Requirements

Fact Sheet

January 2006

1. What responsibilities do district school boards have related to physical education?

In 2004 the Legislature required districts to develop a physical education program stressing physical fitness and encouraging healthy, active lifestyles. Physical education is to consist of physical activities that are sufficient to provide a significant health benefit to students. Each district had until December 1, 2004, to adopt a written physical education policy that detailed the district's physical education program and expected program outcomes.

By requiring a physical education policy the Legislature did not mandate a specific amount of physical education; however, a district that failed to adopt a physical education policy by December 1, 2004 was required to implement a mandatory physical education program for kindergarten through grade 5 that provides students with 30 minutes of physical education per day, 3 days per week.

2. What are the physical education requirements for high school graduation and how may the requirements be met?

Section 1003.43(1)(j), F.S., requires that one of the 24 required credits for high school graduation be in physical education to include assessment, improvement, and maintenance of personal fitness. Students enrolled in one of the accelerated graduation options pursuant to s. 1003.429, F.S., are not required to earn a credit in physical education (Refer to the High School Graduation Requirements Fact Sheet).

The one credit physical education requirement may be satisfied by:

- Taking the personal fitness course and any other one-half credit physical education course.
- Taking one credit in an adaptive physical education course pursuant to an IEP or 504 plan for any student unable to be assigned to a personal fitness course pursuant to physical education guidelines in the Individuals with Disabilities Education Act and Section 504 of the Rehabilitation Act.
- Participating in an interscholastic sport at the junior varsity or varsity level, for two full seasons, and obtaining a passing score of "C" or better on a personal fitness competency test developed by the Department of Education (DOE).
- Completing one semester with a grade of "C" or better in a marching band class or in a physical activity class that requires participation in marching band activities as an extracurricular activity and taking the one-half credit personal fitness course or, if appropriate, an adaptive

physical education course. Completing one semester with a grade of "C" or better in a Reserve Officer Training Corps (R.O.T.C.) class with a significant component in drill and taking the one-half credit personal fitness course or, if appropriate, an adaptive physical education course. A school board may not require that the one credit in physical education be taken during the 9th grade year. According to the Department of Education (DOE), the 3. Which sports satisfy the interscholastic sports that meet this option are generally in one credit physical those categories approved by the Florida High School education requirement? Athletic Association (FHSAA). According to FHSAA, interscholastic sports include: baseball, basketball, football, soccer, swimming and diving, track and field, weight lifting, cross country, golf, softball, tennis, volleyball, and wrestling. The sport must be offered by the high school, not by a civic or community organization; for example, Little League baseball or a local community swim team could not be used to satisfy the physical education credit requirement. In cases where school districts provide organized interscholastic competition in sports other than those governed by the FHSAA, the school board may designate these sports as meeting the requirement if the sport: involves physical exercise and has a set form and body of rules (a game). includes competition between or among schools. is conducted at the junior varsity or varsity levels.

A student may participate in more than one sport to meet the requirement. For example, a student who participates in football in the fall and baseball in the spring meets the two full seasons of participation requirement.

teacher and employed by the local school board.

is under the supervision of a head coach who is a certified

is conducted for a full season.

Students electing to satisfy their physical education requirements by playing an interscholastic sport do not earn a credit toward graduation for participation and must complete an additional credit in an elective course to meet the 24 credits required by the state for graduation.

Each school district must determine if a student has met the interscholastic requirement and must document the eligibility of each student to take the personal fitness competency test. Current law, s. 1003.43(1)(j), F.S., requires the DOE to develop the competency test on physical fitness. In April 2000, the DOE completed and distributed the competency

		Marching band students are not required to pass the
		personal fitness competency test to meet the one-half credit
		requirement.
		The marching band option may not be used in combination
		with participation in an interscholastic sport for only one
		season in order to exempt the full credit physical education
		requirement.

7.	What requirements must be met by students who choose the R.O.T.C. option?	Students electing to fulfill the physical education requirement through the R.O.T.C. option must be enrolled in an R.O.T.C. class with a significant component in drills. R.O.T.C. students are not required to pass the personal fitness competency test to meet the one-half credit requirement. The R.O.T.C. option <i>may not be used in combination with participation in an interscholastic sport for only one season</i> in order to exempt the full credit physical education requirement.
8.	What is the history of physical education requirements in Florida public high schools?	Before 1997, the physical education graduation requirement was "one-half credit of physical education to include assessment, improvement, and maintenance of personal fitness." At that time, the physical education requirement could only be satisfied by taking a physical education course. In 1997, the Legislature passed legislation (Ch. 97-2, L.O.F.) to allow students to take a physical education course or participate in an interscholastic sport at the freshman, junior-varsity, or varsity level, for a full season, to satisfy the one-half credit physical education requirement for graduation. This legislation originated from the idea that students who participate in interscholastic sports work as hard as students who take a physical education course; therefore, they should receive P.E. credit for participation in interscholastic sports. The 1998 Legislature increased the physical education requirement for graduation from one-half to one full credit. Since the graduation requirement increased, the sports participation requirement also increased. Legislation passed by the 2002 Legislature, in Ch. 2002-387, L.O.F., provides that completion, with a grade of "C" or better, of one semester in a marching band class or in a physical activity class may satisfy one-half of the one-credit graduation requirement in physical education. In 2003, the Legislature provided that one-half of the physical education graduation requirement may be met by participation in an R.O.T.C. class with a significant

High School Grading Scale

Fact Sheet

January 2006

		<u></u>
1.	Does Florida have a	Yes. The Legislature first instituted a statewide grading
	statewide grading scale	scale for all public high schools in 1987, and made
	for all public high	modifications in 1997 and 2001. The current high school
	schools?	grading scale is as follows:
		Grade "A" equals 90% through 100%, has a grade
		point average value of 4, and is defined as
		"outstanding progress."
		Grade "B" equals 80% through 89%, has a grade point
		average value of 3, and is defined as "above average
		progress."
		Grade "C" equals 70% through 79%, has a grade point everage value of 2, and in defined as "everage". The state of t
		point average value of 2, and is defined as "average
		progress."Grade "D" equals 60% through 69%, has a grade
		of ade "D" equals 60% through 69%, has a grade point average value of 1, and is defined as "lowest"
		acceptable progress."
		 Grade "F" equals 0% through 59%, has a grade point
		average value of zero, and is defined as "failure."
		Grade "I" equals 0%, has a grade point average value
		of zero, and is defined as "incomplete."
2.	Why did the Legislature	Prior to the creation of the statewide scale, school district
	establish a statewide	"X" could set the grade of "A" as equivalent to 90% to
	grading scale?	100%, while school district "Y" might set it as equivalent to
	grading scale:	94% to 100%. This created a perception that students in
		school district "X" had an unfair advantage over students in
		school district 'Y" in seeking scholarships, gaining college
		admission, and participating in sports. The legislation was
		intended to remedy a perception of unfairness.
3.	What is the basis for the	The 2001 Legislature established the current grading scale
	current high school	that provides a spread of 10 percentage points for each
	grading scale?	letter grade (Ch. 2001-237 L.O.F.), in order to bring the
		public high school grading scale in line with the grading
		scale used by most universities and colleges in Florida and
		in other states so that Florida students have equitable
		opportunities to compete for admission to out-of-state
	One different - 1.1.1.1.	programs and for scholarships.
4.	Can different weights be	Yes, under certain circumstances. In 1995, the Legislature
	assigned to grades?	amended the grading system to allow school districts to
		exercise a weighted grading system for the purpose of
		class ranking.
		The 1998 Legislature required school districts to assign the
		same weights to grades in academic dual enrollment
		courses as honors and Advanced Placement (AP) courses.
		Courses as nonors and Advanced Flacement (Ar.) courses.

High School Grading Scale

		The 1998 Legislature authorized the Department of Education to assign weights to certain courses when evaluating high school transcripts for Bright Futures Scholarship eligibility to remove student motivation to take "easy" courses to earn the grades required for a scholarship, rather than challenging courses that would better prepare them for college.
5.	What are the applicable statutes and rules?	Section 1001.43(8), F.S School board powers and duties regarding student assessment and affairs Section 1003.33, F.S Report cards; end-of-the-year. Section 1003.437, F.S High school grading system. Section 1007.271, F.S Dual enrollment programs. Section 1009.531, F.S Florida Bright Futures Scholarship Program; student eligibility requirements for initial awards.

Articulated Acceleration Mechanisms

Fact Sheet

January 2006

1.	What are articulated acceleration mechanisms?	Articulated acceleration mechanisms serve to shorten the time necessary for students to complete the requirements for a high school diploma or postsecondary degree, broaden the scope of courses available to students, or increase the depth of study available for a particular subject. Participation in articulated acceleration programs allows students to save time and money by earning academic credit that may apply toward postsecondary degree/certificate requirements. A variety of articulated acceleration mechanisms are available in Florida: dual enrollment, advanced placement, early admission, credit by examination, the International Baccalaureate Program (IB) and the Advanced International Certificate of Education Program (AICE).
2.	Who can participate?	Public and private school students are eligible to participate in all articulated acceleration mechanism programs. Home education students may also participate in dual enrollment, early admission, and credit by examination. Postsecondary students may participate in the credit by examination program.
3.	What is early admission?	Early admission is a form of dual enrollment where a student who is working towards a high school diploma enrolls full-time in a postsecondary institution in courses that are creditable towards both the high school diploma and the postsecondary degree. Career early admission is a form of dual enrollment where a student working towards a high school diploma enrolls full-time in a career center or community college in courses that are creditable toward a high school diploma and a certificate or associate degree. Participation in the career early admission program is limited to students who have completed a minimum of six semesters of full-time high school enrollment.
4.	What is the Advanced Placement Program?	The College Board's Advanced Placement (AP) program is a nationwide program consisting of over 30 college-level courses and exams ranging from art to statistics which provides secondary students the opportunity to complete college-level studies during high school. To receive college credit for the course at a public postsecondary institution, students must score a minimum of three, on a five-point scale, on the corresponding Advanced Placement Examination. The Department of Education determines the specific courses for which students receive credit.

	188 4 1	I a
5.	What is credit by examination?	Credit by examination is a mechanism through which secondary and postsecondary students generate postsecondary credit by receiving a specified minimum score on nationally standardized general or subject-area examinations. The examinations and scores required for awarding postsecondary credit are defined by the State Board of Education in the statewide articulation agreement. Community colleges and state universities may also award such credit based on student performance on examinations developed within and recognized by individual colleges and universities.
6.	What is the International	The International Baccalaureate (IB) Diploma Program is a
	Baccalaureate Program?	rigorous pre-university course of study leading to internationally standardized examinations. The program is designed as a comprehensive two-year curriculum that allows its graduates to fulfill requirements of many different nations' education systems. The IB Program is offered through the International Baccalaureate Office (IBO), a nonprofit educational foundation based in Switzerland. The State Board of Education must specify the cutoff scores and the International Baccalaureate examinations that will be used to grant postsecondary credit at community colleges and universities. Students must be awarded a maximum of 30 semester credit hours. The specific courses for which students receive credit is determined by the Department of Education.
7.	What is the Advanced	The Advanced International Certificate of Education (AICE)
	International Certificate	program and the International General Certificate of
	of Education Program?	Secondary Education (pre-AICE) program are international curricula and examination programs modeled on the British pre-college curriculum and "A-level" exams. The programs are administered by the University of Cambridge Local Examinations Syndicate. The State Board of Education must specify the cutoff scores and Advanced International Certificate of Education examinations that will be used to grant postsecondary credit at community colleges and universities. Students must be awarded a maximum of 30 semester credit hours. The community college or university that accepts the student for admission into the program must determine the specific course for which a student receives credit.
8.	What are the advantages for students who participate in certain articulated acceleration programs?	High school students enrolled in dual enrollment courses or participating in early admission programs are not required to pay registration, tuition or lab fees. In addition, instructional materials assigned for use within dual enrollment courses must be made available to dual enrollment students from public high schools free of charge. A community college may provide instructional materials at
		no cost to home education students or students from

private schools participating in dual enrollment courses.

Public school students are also exempt from the payment of any fees for the administration of an Advanced Placement (AP), Advanced International Certificate of Education Program (AICE), the International General Certificate of Secondary Education (pre-AICE) program or International Baccalaureate (IB) examination whether or not the student achieves a passing score on the examination.

Any student who earns nine or more credits from one or more acceleration mechanisms is exempt from any requirement of a public postsecondary educational institution mandating enrollment during a summer term.

Participation in postsecondary acceleration mechanisms can represent a considerable cost savings to the student and family.

9. Are financial incentives provided to school districts and teachers for offering acceleration mechanisms?

School districts that offer AP, IB, and AICE programs as well as the teachers that provide the instruction in these programs may be eligible for financial bonuses.

AP district bonus: A district receives a value of .24 FTE for each student in each advanced placement course who receives a score of 3 or higher on the AP examination, At least 80% of these additional funds must go to the high school offering the AP courses.

AP teacher bonus: A \$50 bonus is paid to each classroom teacher who provides the AP instruction for each student who scores 3 or higher on the AP exam. An additional \$500 bonus is paid to each teacher who teaches an AP course at a "D" or "F" school and who has at least one student who achieves a score of 3 or higher on the AP exam regardless of the number of classes taught or the number of students scoring a 3 or higher on the AP examination.

IB district bonus: A district receives a value of .24 FTE for each student enrolled in an International Baccalaureate course who receives a score of 4 or higher on a subject examination, In addition, the district receives a value of 0.3 FTE for each student who receives an IB diploma.

IB teacher bonus: A \$50 bonus is paid to each classroom teacher who provides the IB instruction for each student who scores 4 or higher on the IB exam. An additional \$500 bonus is paid to each IB teacher at a "D" or "F" school who has at least one student who achieves a score of 4 or higher on an IB exam, regardless of the number of classes

taught or of the number of students scoring a 4 or higher on the IB examination.

AICE district bonus: A district receives a value of .24 FTE for each student enrolled in a full-credit AICE courses who receives a score of E or higher on a subject examination, A district receives a value of .12 FTE for each student enrolled in a half-credit AICE course who receives a score of E or higher on a subject examination. In addition, the district receives a value of 0.3 FTE for each student who receives an AICE diploma.

AICE teacher bonus: Each classroom teacher who provides the AICE instruction is paid a \$50 bonus for each student who scores E or higher on the AICE exam in a fullcredit AICE course. Each classroom teacher who provides the AICE instruction is paid a \$25 bonus for each student who scores E or higher on the AICE exam in a half-credit AICE course. An additional \$500 bonus is paid to each AICE teacher at a "D" or "F" school who has at least one student who achieves a score of E or higher on the fullcredit AICE exam or a score of E or higher on the halfcredit AICE exam regardless of the number of classes taught or of the number of students achieving bonusqualifying scores on the exams. An additional \$250 bonus is paid to each AICE teacher teaching half-credit AICE classes at a "D" or "F" school who has at least one student scoring an E or higher on the half-credit AICE exam. However, the maximum additional bonus for teachers of half-credit AICE classes is limited to \$500 in any given school year. Teachers receiving a bonus associated with instruction in full-credit AICE classes are not eligible for the half-credit bonus.

Teacher bonuses associated with AP, IB, or AICE classes are capped at \$2,000 in any given school year and are in addition to any regular wage or bonus the teacher received or is scheduled to receive.

10. What are the applicable statutes and rules?

Section 1003.429, F.S. -- Accelerated high school graduation options.

Section 1003.43, F.S. -- General requirements for high school graduation.

Section 1007.235, F.S. -- District interinstitutional articulation agreements.

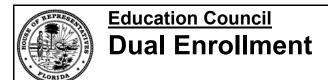

Section 1007.27, F.S. -- Articulated acceleration mechanisms.

Section 1007.271, F.S. -- Dual Enrollment Programs. Section 1007.272, F.S. -- Joint dual enrollment and advanced placement instruction.

Fact Sheet

January 2006

1. What is the dual enrollment program?

The dual enrollment program is a type of acceleration mechanism that allows an eligible high school or home education student to enroll in a postsecondary course creditable toward a career certificate or an associate or baccalaureate degree. Upon completion of a dual enrollment course, the student simultaneously receives high school and college credit. (Refer to the Articulated Acceleration Mechanisms Fact Sheet.) Dual enrollment may serve to shorten the time and money necessary for a student to complete the requirements necessary for a secondary or postsecondary degree. The courses may be conducted during school hours, after school hours, and during the summer term.

2. Who is eligible to enroll as a dual enrollment student in a postsecondary course?

An eligible secondary student is one who is enrolled in a Florida public secondary school or a Florida private secondary school that completes the annual private school survey, including fingerprinting requirements, and conducts a secondary curriculum that meets the statutory high school graduation requirements. Home education students who provide proof of enrollment in a home education program are also eligible to participate in dual enrollment.

Students must demonstrate readiness for the coursework. The student must have a 3.0 GPA for college-level courses and a 2.0 GPA for career certificate courses. If enrolling in a college credit math or English course, students must demonstrate adequate pre-collegiate preparation on basic computation and communication skills assessment through the common placement examination. Exceptions to the required grade point averages may be granted if the educational entities agree. Although community colleges may establish additional admissions criteria, the additional requirements must not arbitrarily prohibit students who have demonstrated the ability to master advanced courses from participating.

3. How is the dual enrollment program coordinated between the secondary and postsecondary educational institutions?

Community colleges and school districts are required, and state universities are encouraged, to jointly develop and implement an articulated acceleration program and agreement. All community colleges and several state universities have these agreements. Additionally, an independent college or university which is located and chartered in Florida, is not for profit, is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools or the Accrediting Commission of the Association of Independent Colleges and Schools, and confers degrees is eligible for inclusion in the dual enrollment program. The articulated acceleration

		,
		 agreement must be completed before registration for the fall term and must include: Available dual enrollment courses and programs. High school credits earned for completion of dual enrollment courses. Student eligibility criteria. Responsibilities regarding student screening, monitoring, cost criteria, and provision of student transportation. Process for converting college credit hours to high school credits.
4.	What level of credit is	The State Board of Education approves the list of dual
	awarded for dual enrollment?	enrollment courses that meet high school graduation requirements and the level of credit that must be awarded once the course has successfully been completed. Currently, dual enrollment four-credit (one semester) foreign language courses, as well as specific semester courses in the subject areas of mathematics and science, receive one full high school credit. For all other dual enrollment courses, six postsecondary semester credit hours equal one high school credit. School districts and community colleges must weigh college-level dual enrollment courses the same as honors courses and advanced placement courses when grade point averages are calculated. For purposes of calculating the
		grade point average for a Florida Bright Futures scholarship, additional weights are added for dual enrollment courses.
5.	What are the provisions	Secondary students may use career dual enrollment as a
	for career and technical dual enrollments?	curricular option to earn elective credits toward the high school diploma, while seeking a degree or certificate from a job-preparatory program. Although a career center or community college may provide a comprehensive academic and career dual enrollment program, it is not required to do so.
6.	How does a secondary student find out about dual enrollment?	Each district school board must inform all secondary students of dual enrollment as an educational option and mechanism for acceleration. Students must be informed of eligibility criteria, the option for taking dual enrollment courses beyond the regular school year, and the minimum academic credits required for graduation. A DOE developed statement must be included to inform
		students, prior to enrollment in a dual enrollment course, of the potential for the dual enrollment course to articulate as an elective or a general education course into a postsecondary education certificate or degree program.
7.	What is early admission?	Early admission is a form of dual enrollment for college-level or career coursework. Eligible secondary students enroll on a full-time basis in a postsecondary institution or a career

dipl cert sen stud	ter in courses that are creditable toward the high school oma and the associate or baccalaureate degree or ificate. To participate, students must have completed 6 nesters of full-time secondary enrollment, including dies undertaken in the ninth grade.

Education Council Interscholastic Extracurricular Activities

Fact Sheet

January 2006

1. What requirements must a student meet to be eligible to participate in interscholastic extracurricular student activities?

A student is eligible to participate in interscholastic extracurricular activities in the school in which he or she first enrolls each school year, or is a candidate for an athletic team by engaging in a practice prior to enrolling in the school. The student is eligible in that school as long as he or she remains enrolled in that school.

To become eligible a student must maintain:

- a 2.0 grade point average (GPA) or above on a 4.0 scale in the semester preceding participation; OR
- a cumulative 2.0 GPA.

However, a student is not required to maintain a *cumulative* 2.0 GPA until his or her junior and senior year.

Prior to a student's junior year, if his or her GPA falls below the minimum *cumulative* 2.0 required for graduation, the student must enter into a contract with the school district, the appropriate governing association, and the student's parents or guardian. The contract must require the student to attend summer school or its graded equivalent.

If a student is convicted of a felony or commits a delinquent act that would have been a felony if committed by an adult, the student's eligibility for participation in interscholastic extracurricular activities will be determined by the established and published policy of the school board, regardless of whether adjudication is withheld.

A school district may set additional eligibility requirements, but the requirements must not make participation less accessible to home education students than to other students.

2. Can a home education student participate in interscholastic extracurricular activities?

Yes. A home education student is allowed to participate in interscholastic extracurricular activities at the public school to which the student would be assigned, the public school which the student could choose to attend pursuant to open enrollment provisions, or the private school which the student could choose to attend pursuant to an agreement.

In order to participate in interscholastic extracurricular activities, a Florida home education student must:

 demonstrate educational progress by an agreed upon method of evaluation;

meet the same residency requirements as other students in the school at which he or she participates: meet the same standards of acceptance, behavior, and performance as required of other participating students; register his or her intent to participate with the school before the beginning date of the season for the activity. A public school or private school student who has not maintained academic eligibility may not participate in interscholastic extracurricular activities as a home education student until the student successfully demonstrates educational progress in a home education program for one grading period. Yes. A charter school student is eligible to participate in 3. May a charter school interscholastic extracurricular activities at the public school student participate in to which the student would be assigned or the public school interscholastic which the student could choose to attend pursuant to open extracurricular activities? enrollment provisions unless such activities are offered by the student's charter school. In order to participate in interscholastic extracurricular activities, a Florida charter school student must: meet all of the requirements established by the charter school governing board. demonstrate educational progress by maintaining certain grade point average requirements. meet the same residency requirements as other students in the school at which he or she participates. meet the same standards of acceptance, behavior, and performance as required of other participating students. register his or her intent to participate with the school before the beginning date of the season for the activity. A public school or private school student who has not maintained academic eligibility may not participate in interscholastic extracurricular activities as a charter school student until the student successfully demonstrates educational progress in a charter school for one grading period. 4. Who sets and oversees In 1997, the Legislature statutorily designated the Florida High School Activities Association (FHSAA) as the eligibility requirements organization to operate, govern, regulate, and oversee for athletic programs in athletic programs, including eligibility requirements, for public schools? Florida's public schools. In 2003, based upon the recommendation of the FHSAA board of directors, the Legislature changed the name of the association to the

Florida High School Athletic Association. The FHSAA is not a state agency, but has a quasi-governmental function.

		[V B. () () () () () () () () () (
5.	Can private schools participate in the FHSAA and compete against public schools?	Yes. Private schools that wish to compete against public schools in athletic events may become members of the FHSAA.
6.	Do students who wish to participate in interscholastic athletic activities have to pass a medical evaluation prior to participation?	Generally a student wishing to participate in interscholastic athletic activities must satisfactorily complete a medical evaluation by a licensed practitioner. If the practitioner finds any abnormalities in the cardiovascular system, the student may not participate until further cardiovascular assessment, which may include an EKG, is performed. The cardiovascular assessment must indicate that the student is physically capable of participating in interscholastic athletic competition.
		The exception is that a student may participate in interscholastic athletic activities without undergoing a medical evaluation if his or her parent objects in writing to the evaluation because the evaluation is contrary to his or her religious tenets or practices. However, no liability shall exist when a student who does not undergo a medical evaluation is injured or dies during his or her participation in an interscholastic athletic activity as a result of a medical condition that would have been detected during a medical evaluation.
7.	How is the FHSAA governed and structured?	The FHSAA includes a 15-member board of directors, a representative assembly, a public advisory committee, and a committee on appeals. Each member school appoints an official representative who must be the principal, an assistant principal, or an in-house athletic director. The organization's membership is divided along existing county lines into four contiguous and compact administrative regions, each containing approximately the same number of member schools. The FHSAA was restructured to operate as a representative democracy in which the sovereign authority is within the member schools.
		The 2003 Legislature required that any entity that appoints a member to the board of directors must examine the ethnic and demographic composition of the board when selecting candidates for appointment and, to the greatest extent possible, make appointments that reflect state demographic and population trends. The Legislature also requires that one of the three representatives appointed by the Commissioner of Education must be appointed to balance the board for diversity or state population trends, or both.
8.	What are the applicable statutes?	Section 1006.15, F.S Student Standards. Section 1006.16, F.S Insurance. Section 1006.17, F.S Sponsorship of athletic activities; rulemaking.

Interscholastic Extracurricular Activities

		Section 1006.18, F.S Cheerleaders safety standards. Section 1006.19, F.S Audit of records of nonprofit organizations handling interscholastic activities. Section 1006.20, F.S Athletics in public K-12 schools.
